Dysilk®
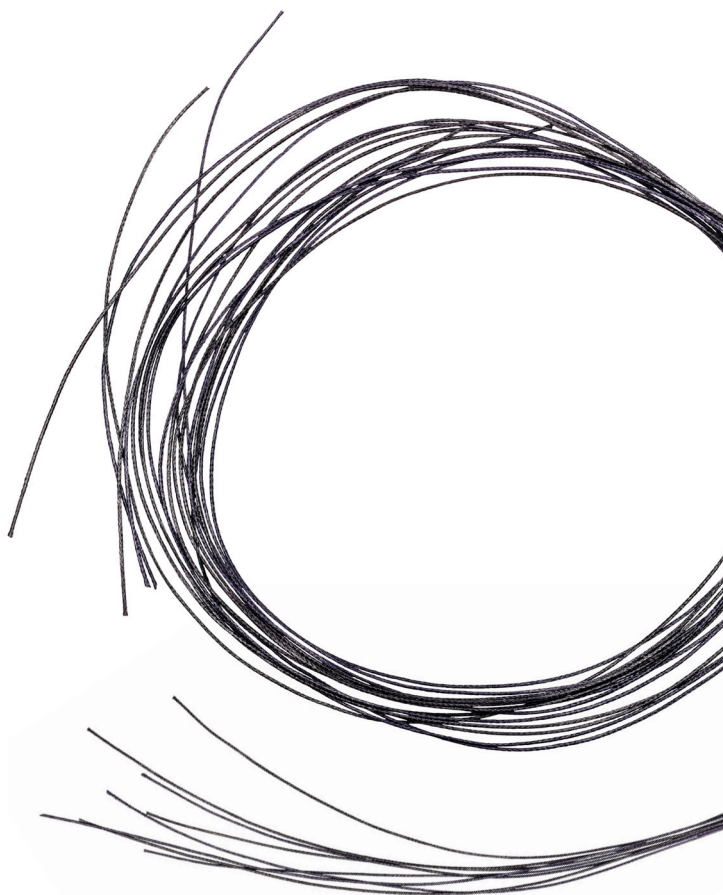

Black braided multifilament silk

Natural
Non-absorbable

Suggested procedures

- Dental
- Oral maxillo facial
- Ophthalmic
- Subcuticular
- General / Intestinal
- Plastic

Features

- Excellent handling and tying properties
- Very low memory prevents knotting and tangling during suture removal
- Specially treated braid allows ease of handling
- Braid made of a core of twisted silk around which a cover is plaited
- Uniform thread diameter and surface smoothness for good knotting characteristics
- Doesn't become hard or difficult to handle
- Ties down with a high degree of knot security
- Available in sterile pre-cut lengths of various sizes
- Sutures made with 300 series stainless steel
- Up to five-year shelf life
