

# EXAHIFLEX

## Hydrophilic Vinyl Polysiloxane Impression Material

EXAHIFLEX is a high-performance\* silicone impression system. EXAHIFLEX Injection and Regular feature double the elasticity of conventional silicone impression materials, have high tear strengths\* and give excellent recovery from deformation to ensure accurate impressions. EXAHIFLEX Tray material is a paste formulation "putty-style" material suited for use with either EXAHIFLEX Injection or Regular in the Double mix Single impression technique. EXAHIFLEX Tray's firm setting characteristics give support and stability to ensure dimensionally stable impressions.

### Advantages:

- **Early wetting:** A new bifunctional surfactant allows EXAHIFLEX to more effectively displace moisture and flow over wet surfaces.
- **Shear thinning:** The new VPS polymer mix is highly thixotropic and under pressure will flow and replicate critical, hard-to-reach details.
- **Excellent elasticity:** The excellent rubber qualities of EXAHIFLEX mean impressions can be removed easily from prepared areas and undercuts, without tearing or distortion. This also reduces the potential for broken dies during multiple pouring.
- **Adequate working time:** Gives the clinician adequate time to load the material and place it in the mouth.
- **Snap set:** Only 3 minutes holding time in the mouth.
- **Sharper detail:** A new pigment has been introduced which more effectively reflects light from the surface of the impression. Detail is easy to read.
- **Immediate pouring:** Patented hydrogen scavenger system allows immediate pouring with no risk of bubbling on models.
- **Excellent stability:** Able to be poured up to 2 weeks after impression taking
- **Compatible:** EXAHIFLEX is compatible with other brands of VPS materials
- Stable in cold sterilisation solutions – 2-year shelf life

### Packaging:

**EXAHIFLEX INJECTION TYPE**  
2x 48mL cartridges  
8x mixing tips (pink)

**EXAHIFLEX REGULAR TYPE**  
2x 48mL cartridges  
6x mixing tips (green)

**EXAHIFLEX TRAY TYPE**  
2x 48mL cartridges  
6x mixing tips (green)
