

Seal-Tight™

Disposable Air/Water Syringe Tips

Disposable devices can offer many advantages in infection prevention. That's why our KaVo Kerr line offers single-use solutions with a range of versatile disposable air-water syringe tips.

Our patented technology turns the traditional approach on its head by using a unique interlock system yielding high-quality/optimal syringe tips for dry air, on demand, every time. Disposable syringe tips with built-in rubber O-ring seals make syringes work like new with every use.

Flexible
Reaches difficult areas

Reduces Service Fees
Decreases wear and tear

Durable
Ideal for cheek retraction

Saves Time
No more autoclave tips

Easy Installation
A fresh seal everytime

Minimize Cross Contamination
Dispose after each patient

Seal-Tight Adapter Selection Guide

ADEC STYLE

#1

If syringe has a tip insertion fitting like picture #1, you need Seal-Tight Adapter No. 77021

#2

If syringe has a tip insertion fitting like picture #2, you need Seal-Tight Adapter No. 77021

PRESS RING STYLE

#3

If syringe has a tip insertion fitting like picture #3, you need Seal-Tight Adapter No. 77024-1

#4

If syringe has a tip insertion fitting like picture #4, you need Seal-Tight Adapter No. 77024-1

77021 – “A” – Adec Style: This adapter will fit ALL Adec Style syringes as referenced on the Adapter selection guide, regardless of whether they have been previously converted with Sani-Tip or Pro-Tip adapters. (Includes: Adec, Ampco, Aseptico, Beaverstate, Belmont, DentalEZ, Dentrex, Empire, Forest, Hampton, Healthco, MDT, Parkell, Robbins, Schein Euro-C, Scope, Unitek, Vacudent,

77024-1 – STANDARD “P”: Press Ring Style: This adapter, like the “A”, must be screwed into the syringe. This MUST be used when the syringe has been previously converted to Sani-Tip or Pro-Tip, since the original Press Ring mechanism is usually gone from the office. (Includes: Belmont, Biotec, DCI, Dentech, Kavo, Marus, Pelton & Crane, Planmeca, Proma)

77025-1 – Quick Connect “P” Press Ring Style:

This is to be used on any Press Ring Style syringe that has not previously been converted in any way, and the original Press Ring mechanism is intact.

NOTE: There are two other adapters that are rarely used, the “D” (Dental-Ez) and “M” (Engle-Marco). Both of these syringes will be marked with the logo of the company, and if you suspect that these are the syringes that your office has, please call Customer Care.
