

Ivory® Rubber Dams and Clamps

The complete system for tooth isolation.

Increasing practitioner efficiency and patient safety, rubber dams are the cornerstone of excellent restorative and modern dentistry. The Ivory Rubber Dam system by Kulzer is designed to help you perfectly isolate the treatment area so that you can do your best work free from distraction.

Giving a hand to oral health.

KULZER
 MITSUI CHEMICALS GROUP

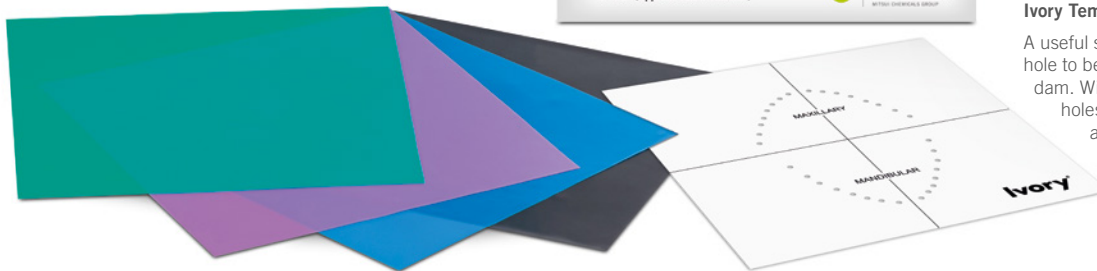

Rubber dam – isolate better, work better.

Flexible options for uncompromising isolation.

Rubber dams are proven to increase the success of endodontic, restorative and cosmetic treatments because it provides the clean and dry working field you need to place adhesive restorations that last.

Made from natural latex that has been washed in the manufacturing stage to reduce surface proteins, the original Ivory Rubber Dam* material is thin and pliable yet boasts an extremely high tear strength.

Additionally, the Ivory Rubber Dam line gives you flexible freedom of choice in selecting the rubber dam material that's perfect for your needs. You can choose latex-free material, black-colored material for very high visual contrast, and even mint-flavored material to give your patients a more pleasant experience.

Ivory Template

A useful support for easy marking the hole to be pushed out of the rubber dam. With this easy help you get the holes where you need them for the application and you have the option to place the holes freely according to your needs.

- Powder-free, thin, comfortable sheets
- 100 % natural latex with no added fillers
- Latex-free material also available
- Pleasant mint flavor
- High-contrast black-colored material for better visibility
- Extremely high tensile strength**
- Expansion up to 10x from the original punch hole**
- Prevents irritation and damage of soft tissues

* The legal production site for Ivory Rubber Dam is Sanctuary Health Sdn Bhd, No 16, Persiaran Perindustrian Kanthan 1, Kawasan Perindustrian Kanthan, 310200 Chemor, Perak, Malaysia.

Ivory accessories

Durable and reliable.

Ivory® Punch

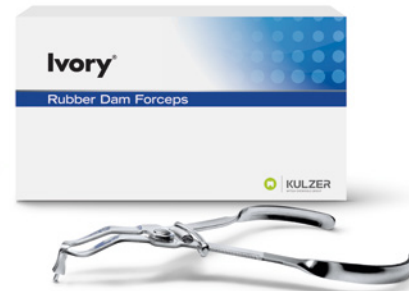

This precision instrument is made from high-quality stainless steel and has a rotating cutting disc and a unique floating plunger that strikes the cutting disc evenly, guaranteeing a tear-resistant and perfectly sized hole for any tooth.

Ivory® Forceps

Place rubber dam clamps with ease.

You'll get many years of reliable use out of these Ivory stainless steel forceps. These forceps will reach around the bow of any Ivory clamp without tilting, which is especially important when reversing a clamp. The straight head design makes it easy to grip and place Ivory clamps of any size.

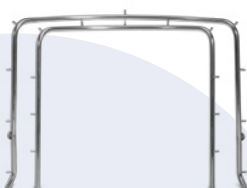

With Ivory® Rubber Dam materials and instruments by Kulzer, you can make the use of rubber dam a fundamental part of your treatment approach and start enjoying all the benefits.

Ivory® Rubber Dam Kits

Ivory® Rubber Dam Kits supply you with everything you need to use rubber dams with confidence. All instruments are designed for durability and ease of use and are made from high-grade stainless steel.

Not sure which clamps you need?

The **Ivory® Rubber Dam Clamps Starter Kit** offers a varied selection of popular general-use clamps that cover most needs.

This accessory is made of stainless steel and auto-clavable. It is available in two sizes – children 5" x 5", adults 6" x 6".

New to using rubber dams?

The **Ivory® Rubber Dam Intro Kit** is a self-contained unit that includes the instruments you need to get started.

Intro Kit

- 1x Box 6" x 6" Blue Medium Rubber Dam
- 1x 6" x 6" Marking Template
- 1x 6" Frame
- 8x Most Popular Clamps (0, 2A, 8A, 14, 2, 7, 9, 14A)
- 1x Clamp Forceps

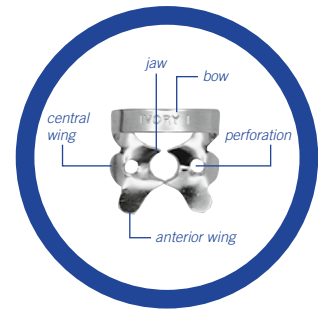

Note: Ivory® Punch must be ordered separately.

Ivory® Rubber Dam Clamps

A secure hold for absolute isolation.

Choose from a wide variety of uniquely designed Ivory Rubber Dam Clamps to find the perfect one for each tooth. Our line includes a clamp for every application. Every single clamp is crafted in the USA from high-grade stainless steel and carefully hand-set so that you can confidently affix the rubber dam whenever it's needed.

Molar

3

For small lower molars. Narrow, flat jaws so as not to impinge in tissue.

3
W3

4

For small uppers. Narrow jaws adapt to fit round cervical (neck) collars.

4
W4

5

For large upper molars. Jaws adapt to curvature at the gum line.

5
W5

7

General purpose lower molar. Medium-sized bow and jaws. Flat jaws. For teeth which tend to be square in form.

7
W7

7A

For large lower molars. Same as No. 7, only larger. Large bow, broad jaws.

7A

8

For small upper right and lower left molars with short crowns. Buccal jaw broader than lingual.

8
W8

8A

For upper, lower molar roots. Four-point jaws grasp root at corners. Jaws set dam beneath gum line when released.

8A
W8A

10

For small upper left and lower right molars with short crowns. Buccal jaw broader than lingual.

10

11

For small upper right and lower left molars with short crowns. Buccal jaw broader than lingual.

11

12A

For all lower right molars, particularly third molars and partially erupted teeth. Available with serrated jaws only.

12A

13A

For all lower left molars, particularly third molars and partially erupted teeth. Available with serrated jaws only.

13A

14

For upper and lower molars, partially erupted, round teeth or for teeth sloping from the gum line. Small bow.

14
14DT
14T
W14

14A

Same as No. 14, only larger in every way.

14A
W14A

26

For small lower molars.

26

26N

Universal upper with festooned jaws.

26N

27

For large upper and lower molar distal cavities.

27

28N

General purpose lower molar clamp.

28N

56

For all large upper and lower molars.

56
56T
W56

Central Anteriors

00

For small lower anteriors and teeth set irregularly in arch. High bow, narrow jaws.

00

6

For anterior labial and premolar teeth.

6

9

For anterior labial teeth.

9
9T

Which Ivory® Rubber Dam Clamp do you need?

Listed below is the complete Ivory Rubber Dam Clamp line, along with guidelines to help you select the right clamp for the job.

Most Popular Clamps

PREMOLARS – WINGED

- 00 Small lower, anterior
- 0 Elongated small neck
- 1 General purpose upper
- 2 General purpose lower
- 2A Large neck premolar

PREMOLARS – WINGLESS

- W2 General purpose lower
- W2A Large neck premolar

MOLAR – WINGED

- 3 Small lower
- 4 Small upper for round teeth
- 7 General purpose lower
- 8 General purpose upper
- 8A Upper and lower molar root
- 12A Right partially erupted, 3rd molar
- 13A Left partially erupted, 3rd molar
- 14 Partially erupted, most popular clamp

MOLAR – WINGED (CONTINUED)

- 14A Large, partially erupted
- 56 All large molars

MOLAR – WINGLESS

- W3 Small lowers
- W8A Upper and lower molar root
- W14A Large partially erupted

Specialty Clamps

PREMOLARS – WINGED

- 1A Root clamp

PREMOLARS – WINGLESS

- W0 Elongated small neck
- W1 General purpose upper
- 27N Universal

MOLAR – WINGED

- 5 Large upper
- 7A Large lower
- 10 Right, small short crown

MOLAR – WINGED (CONTINUED)

- 11 Left, small short crown
- 26 Small lower molar
- 27 Distal access, large molar

MOLAR – WINGLESS

- W4 Small upper
- W5 Large upper
- W7 General purpose lower, square teeth
- W8 General purpose upper, round teeth
- W14 Partially erupted

MOLAR – WINGLESS (CONTINUED)

- W56 Large molar
- 26N Universal upper
- 28N General purpose lower molar

LABIAL – WINGED

- 6 Central and incisor
- 9 Labial prep, all anteriors

GLUMA® Desensitizer – More gain, less pain.

For more than 20 years, one drop of GLUMA Desensitizer has been all you need to stop and prevent hypersensitivity. The result is fast and effective, without mixing, curing or repetitive steps. And your patients feel a prompt relief. Use GLUMA Desensitizer under every restoration – direct and indirect – to ensure your patients the comfort they deserve. Your patients appreciate the fast, effective and long-term results.

Prevent glutaraldehyde-induced irritation of the gingiva:
Use Ivory® Premium Rubber Dam

GLUMA Desensitizer's benefits at a glance.

- One-step placement** ▶ No agitation or light curing required makes it easy to use and saves time
- Universally compatible** ▶ GLUMA Desensitizer can be used with bonding and restorative materials, in any situation
- Economical** ▶ One drop, multiple applications
