

Varnish Best Practice for Your Practice

Enamel Pro® Varnish™ 5% Sodium Fluoride Varnish

All varnishes are not equally effective! Enamel Pro Varnish is the first advanced fluoride varnish optimized to provide beneficial tooth-building ions of calcium and phosphate. Uniquely designed to create substantive forms of CaF_2 and ACP, Enamel Pro Varnish is ideal for reducing dentinal hypersensitivity and post-operative sensitivity.

In fact, independent studies^{1,2} show Enamel Pro Varnish delivers more enamel fluoride uptake and greater fluoride release than 3M Vanish. And unlike the leading fluoride varnish, Enamel Pro Varnish is proven to diminish hydraulic conductance by 73%.³ Every time.

In a study evaluating incubation conditions on fluoride release in vitro, Enamel Pro Varnish displayed greater fluoride release than both 3M Vanish and Colgate Duraphat.^{1,2}

Protect your patients' teeth!

Enamel Pro Varnish offers a nice esthetic appearance and will please your patients. Numerous studies support fluoride uptake, fluoride release and diminished hydraulic conductance.^{1,2,3}

In fact, Enamel Pro Varnish with ACP formula delivers more enamel fluoride uptake and greater fluoride release than 3M Vanish with TCP!¹

Enamel Pro Varnish provides 4x more fluoride uptake into sound enamel and significantly more fluoride uptake into surrounding lesioned enamel than 3M Vanish.¹ And in an independent study evaluating incubation conditions on fluoride release in vitro, Enamel Pro Varnish displayed greater fluoride release than both 3M Vanish and Colgate Duraphat.^{1,2}

Indications for Use

Enamel Pro Varnish is a fluoride-containing preparation for the treatment of dentinal hypersensitivity and for the reduction of post-operative sensitivity.

Easy Application

- ✓ Peel off foil top, stir varnish with applicator brush, mix thoroughly
- ✓ Apply thin coat of varnish across tooth surfaces
- ✓ Sets on contact with saliva

Enamel Pro Varnish is easy to apply and aesthetically pleasing.
