

Speedy Clean

BIODEGRADABLE WIPES
Hospital-Grade Neutral Detergent

Whiteley's NEW Biodegradable Wipes, put the **green** in Speedy Clean

Speedy Clean Biodegradable Wipes are plastic-free wipes made from 100% plant-based fibres, ensuring a sustainable and eco-friendly option. They are completely dye-free, offering a natural, gentle choice for surface cleaning. The wipe fibres will biodegrade under certified commercial composting conditions, reducing their environmental impact. Each pack contains 100 wipes with a moisture lock lid to keep them fresh. Speedy Clean Biodegradable Wipes are formulated to clean effectively without leaving harmful residues, making them ideal for sensitive healthcare environments where hygiene is crucial.

Made from 100% Plant Based Fibre

Plastic Free Wipes

100% Dye Free

Wipe fibres will biodegrade
under certified commercial composting conditions

Pack Details

- 100 Wipes Per Pack
- Wipe Size 200 x 250 mm
- ARTG No: 125529
- Moisture lock lid
- 12 per carton
- Product Code 190338

Benefits of using Speedy Clean Biodegradable Wipes

- 1. Environmentally Friendly:** They break down naturally over time, reducing waste and preventing long-term pollution that synthetic wipes can cause.
- 2. Reduces Plastic Pollution:** Unlike traditional wipes, which contain plastic fibres, biodegradable wipes do not contribute to microplastic pollution in landfills or oceans.
- 3. Sustainable:** Made from renewable resources (like plant fibres), biodegradable wipes are a more sustainable option compared to petroleum-based products.
- 4. Safe for Wildlife:** As they decompose, biodegradable wipes are less harmful to wildlife compared to non-biodegradable alternatives.

Speedy Clean Biodegradable Wipes are commonly used in healthcare settings for cleaning various surfaces including:

- 1. Patient Rooms:** Wiping down surfaces like bedrails, tables, and furniture to maintain hygiene and prevent the spread of infection.
- 2. Clinical Areas:** Cleaning exam tables, medical equipment, and countertops in examination rooms, clinics, and procedure areas.
- 3. Dental Practices:** Wiping down chairs and surfaces between patients, ensuring a clean and safe environment.
- 4. Bathrooms and Restrooms:** Regular cleaning of toilets, sinks, and other high-touch areas to prevent cross-contamination.
- 5. Nursing Stations:** Cleaning workstations, computers, and other shared equipment used by healthcare professionals.
- 6. Waiting Areas:** Cleaning chairs, tables, and high-touch areas in waiting rooms to reduce the spread of germs.

APPLICATION: Remove gross soiling from the surface and clean using a Speedy Clean Biodegradable Wipe in one direction only across the surface to prevent contamination. Dispose of the soiled wipe to an appropriate receptacle. Allow surface to dry.

NOTE: Do not flush wipes down toilet or sluice drain.

STORAGE: Store below 30°C.

Additional information is listed on the Safety Data Sheet. Non-hazardous as defined by Safe Work Australia guidelines.
