Opalescence™ Boost

For use with customized take-home whitening trays, Opalescence PF teeth whitening gel offers many options for patients. With **five concentrations** and **two flavors**, patients can completely customize their whitening experience.

Opalescence Go teeth whitening trays can be carried in a pocket or bag and **worn right out of the package**. With no need for impressions, models, lab time, custom trays, or LED teeth whitening lights, Opalescence Go teeth whitening trays are **easy and convenient** for usage.

Opalescence Boost in-office power whitener is a **chemically activated gel** that offers brighter, whiter teeth after about an hour in the dental chair. With just **two or three 20-minute treatments** its powerful 40% hydrogen peroxide formula provides noticeable results in as little as one hour.

(INDISPENSE REFILL)#685

## Tried, True & BLUE

Ultra-Etch etchant 35% phosphoric acid solution features ideal viscosity, facilitates precise placement and superior control. It is self-limiting in its depth of etch (average depth of 1.9 µm with 15-second etch)

1 IndiSpense syringe = equivalent of **25 individual 1.2 mL syringes**

Scan to see how  
you can use the  
Ultra-Etch

Ultra-Etch etchant's ideal viscosity facilitates precise placement and superior control.

Clinical experience and FE-SEM evaluations show that 15 seconds etch time on both dentin and cut enamel provides optimal condition of both tissues.

"For a procedure as fine-tuned and finicky as adhesive bonding, Ultra-Etch offers me unparalleled control in an easy-to-extrude, non-drip yet easy to disperse formula that allows precise placement and coating of the substrate whether you are working with a total etch or selective etch technique. It is the benchmark phosphoric etch on the market."
